Though it's relatively painless to sit through, *Mortal Thoughts* is full of holes and devoid of logic, which is intolerable in a murder mystery. Demi Moore and Glenna Headly play best friends mixed up in a murder. Unfortunately, the psychological motives behind their behavior are bogus and make no sense whatsoever. To add insult to injury,

there really isn't any mystery here, since only one of the two possible endings makes the story even remotely worth telling. If you scrutinize the story line for more than 30 seconds, you quickly realize that *Mortal Thoughts* is the epitome of an "Is That All There Is?" movie—or, in other words, a complete waste of two hours.
